EXPERIENCE

Digital Harbor
Mobile App Developer
(November 2020 - Present)

- I was responsible for refactoring the structure of the e-commerce App, change the app's state management to BLoC and implement SOLID principles.
- I was Enhanced UI Rendering Frames by 32%, so you feel smooth while using the app.
- I wrote a simple boilerplate code that I could easily git clone and simply kick-off on a project.
- I responsible for adding some animations for the app to feel like a legend while using apps.

JMSKEF
Mobile App Developer
(May 2020 - October 2020)

- I was responsible for creating the structure for the queue management system.
- I was responsible for integration with stripe payment.
- I created a Dashboard app that gives admin some analytics about users/bookings, which saved a lot of time in managing work.

Al Azhar University
Founder of Google Developer Student Club
(November 2019 - August 2020)

- I was selected as one of the TOP Leaders over the MENA Region.
- Our Team classified as Best Chapter over MENA Region in the first term.
- We trained more than 1000 trainees in 3 months.

Timevl
Android Native Developer (Intern)
(August 2018 - November 2018)

- Worked on Android Application that serves Tourism in Egypt.
- I created many activities/screens in that app that used as a prototype for pitching to the accelerator.

EDUCATION

Al-Azhar University
Language And Translation, English Department
(September 2017 - Present)
